DeFelsko[®]
The Measure of Quality

PosiTest[®] DFT

Paint Thickness Gage

Ideal for verifying the thickness of paint on new and pre-owned automobiles, making it easy to identify collision damage and refinish work in all types of weather and lighting conditions.

Two Models

- **PosiTest DFT Ferrous** \$495.00
measures paint on STEEL only including body panels, engine components and wheels.
- **PosiTest DFT Combo** \$695.00
measures paint on ANY METAL including steel and aluminum. A popular choice given many cars now have both steel and aluminum body components. **Automatically** recognizes the base metal and takes a measurement.

Actual Size

Uses

- Identify repainted panels and all previous refinish work
- Help determine the value of vehicles at auction or trade-in
- Buff with precision and confidence. Locate where extra work is needed
- Improve finish consistency and quality
- Cut expensive paint materials and costs
- Show customers where more paint stripping or re-clearcoating is needed
- Determine depth of acid rain damage

Features

- Simply measure right out of the box
- No calibration required
- Large, easy-to-read display
- Works in all types of weather conditions
- Fast, accurate measurements
- Pocket-size for one-hand operation
- Durable, quality construction
- Approved by major Dealer Equipment Programs
- Made and serviced in the USA
- 2 Year warranty
- 30 Day money back guarantee
- Mil/Microns switchable
- Basic instructions on the back of each gage

Specifications

Measurement Range	0 – 40 mils	0 – 1000 µm
Accuracy	±(0.1 mils + 3%)	±(2 µm + 3%)
Size	4 x 1.5 x 0.9 in.	100 x 38 x 23 mm
Weight	2.5 oz.	70 g

Gage Comes Complete with built-in probe, plastic shims, hard shell storage case, AAA battery, instructions and two (2) year warranty.

Options

- Leather pouch with belt clip \$15.00

Conforms to: ISO 2178/2360/2808, prEN ISO 19840, ASTM B244/B499/B659/D1186/D1400/E376/G12, BS3900-C5, SSPC-PA2 and others. *Certificate of Calibration traceable to NIST available.*
